Bengaluru, India

Product Manager with 3+ years turning ambiguous problems into shipped product across civic tech, AI, fintech-scale operations, and consumer apps. A software-engineering background and hands-on delivery leadership mean I don't just define the roadmap — I ship it. 17+ products delivered; 8+ concurrent programs run at once; 95% client satisfaction across global engagements.

EXPERIENCE

Project Manager — Cumulations Technologies, Bengaluru

Nov 2023 – Present

- Run portfolio-level delivery across 8+ concurrent AI, mobile, and enterprise-web programs.
- Built the KPI and risk-management framework now used org-wide — 40% lift in program visibility, 30% fewer escalations.
- Own project budgeting end to end and improved cost-per-project efficiency through tighter resource allocation.
- Standardised Agile ceremonies across teams of 5–15, cutting cycle time by 20%; introduced AI-assisted QA workflows (~20% QA time).
- Primary contact across three global engagements — Arise (USA), TGI Sports (UK), Berlinger (Switzerland) — at 95% client satisfaction.

Software Developer — Cumulations Technologies, Bengaluru

Jan 2023 – Oct 2023

- Built Flutter apps integrating RESTful APIs and payment gateways.
- Cut production crash rate from 2.1% to 0.3% through rigorous QA.
- Translated business requirements into technical specs and delivery plans.

Big Data Intern — Cognizant Technology Solutions, Pune

May 2022 – Dec 2022

- Supported ETL pipeline delivery; optimised pipelines improving processing speed by 35%.
- Contributed to an analytics dashboard used by 500+ stakeholders.

Co-Founder — Mom's Chapati, Pune

Apr 2019 – Feb 2020

- Ran procurement, logistics, and operations for a 12-person team.
- Scaled to Rs 90,000 monthly revenue within 6 months on 200+ daily orders.

SELECTED PROJECTS

BBMP E-Khata (Civic tech). Redesigned Bengaluru's property-record portal — cut median time-on-task from 40 to 15 min, reduced a 40,000+ issue backlog to ~200; now ~5cr hits/month.

BAMUL (Agri / Fintech-scale). Led an 8-month Oracle EBS migration across a 13-person team, supporting a payment pipeline of ~Rs 2,000 cr/year without disrupting operations.

Majik Kids (Consumer). Owned an audio-stories app end to end — Flutter + Appwrite — to 1,000+ organic downloads within 2 months.

Hello UPI / Tonetag (Fintech). Delivered an in-car UPI payment SDK for Tata Motors — 15% faster transactions with validated fraud prevention.

TGI Sports (AdTech / Sports, UK). Owned a real-time stadium LED advertising platform through MLB onboarding and multi-vendor integration; launched on schedule, contract renewed.

Ragmetrics (AI / LLM). Directed synthetic-data pipelines and automated LLM evaluation criteria, improving model-evaluation accuracy.

SKILLS

Product: Strategy, discovery, roadmapping, PRDs & user stories, prioritisation, A/B testing, user research, GTM, competitive analysis

Program: Governance, cross-project dependencies, KPI & risk frameworks, budgeting & cost control, capacity planning, Agile at scale
