SUMMARY

SAFe 6.0 POPM-certified Product Manager with 3+ years and 17+ shipped products across civic tech, AI/LLM tooling, fintech, and consumer mobile. An engineering background — Flutter, REST APIs, payment gateways — means technical trade-offs get pressure-tested rather than relayed. Cut median task time on Bengaluru’s E-Khata property portal from 40 minutes to 15 at roughly 50M monthly hits; ran an 8-month Oracle EBS migration behind a ₹2,000 Cr (~\$210M) annual payment pipeline; 95% client satisfaction across US, UK, and Swiss engagements.

CORE COMPETENCIES

Product: Product Strategy, Product Vision, Roadmapping, Product Discovery, PRDs & User Stories, Acceptance Criteria, Feature Prioritization, Backlog Grooming, MVP Definition, A/B Testing, User Research, Usability Testing, Go-to-Market, Competitive Analysis

Delivery & Leadership: Agile (Scrum & Kanban), SAFe (PI Planning, ARTs), Sprint Planning, Retrospectives, Release Management, Cross-Functional Leadership, Stakeholder Management, Executive Communication, KPIs & Success Metrics, Data-Driven Decision Making, Budget Management, Resource & Capacity Planning, Risk Management

Technical: AI/ML & LLM Evaluation, OpenAI APIs, Prompt Engineering, Flutter/Dart, REST APIs, SQL, Python, React/TypeScript, AWS, Systems Integration, SDK Delivery

Tools: Jira, Confluence, Figma, Notion, Miro, Asana, MS Project, Power BI, Google Analytics, Power Automate, Git/GitHub, Slack

PROFESSIONAL EXPERIENCE

Project Manager — Cumulations Technologies, Bengaluru Nov 2023 – Present

- Own product delivery for 8+ concurrent AI, mobile, and enterprise web products, running discovery, writing PRDs and user stories, and setting acceptance criteria with design and engineering from concept through release.
- Built the KPI and risk framework now used across every active program, raising cross-program visibility 40% and cutting client escalations 30%.
- Define success metrics with clients before build starts, so feature prioritization is argued from data rather than by whoever asks loudest.
- Redesigned QA by pairing AI agents with human review, cutting QA cycle time 20% across the portfolio.
- Standardized Agile ceremonies — sprint planning, backlog grooming, reviews, retrospectives — across cross-functional teams of 5–15, reducing cycle time 20%.
- Serve as primary product contact for three global engagements (Arise, USA; TGI Sports, UK; Berlinger, Switzerland), translating user and business needs into roadmap decisions at a 95% client satisfaction score.
- Own portfolio budgeting end to end and lead resource and capacity planning across design, engineering, QA, and data science, improving cost-per-project efficiency and growing revenue through expanded scope in existing accounts.

Software Developer — Cumulations Technologies, Bengaluru Jan 2023 – Oct 2023

- Shipped cross-platform Flutter apps integrating REST APIs and payment gateways.
- Drove production crash rate from 2.1% to 0.3% through rigorous QA and release discipline.
- Translated business requirements into technical specs and delivery plans alongside product and project managers.

Big Data Intern — Cognizant Technology Solutions, Pune May 2022 – Dec 2022

- Supported ETL pipeline delivery for enterprise clients; optimization work improved processing speed 35%.
- Contributed to an analytics dashboard adopted by 500+ stakeholders.

Co-Founder — Mom’s Chapati, Pune Apr 2019 – Feb 2020

- Founded a cloud-kitchen operation, running menu, pricing, procurement, and logistics for a 12-person team; scaled to ₹90,000 monthly revenue and 200+ daily orders within 6 months.

SELECTED PRODUCT WORK

BBMP E-Khata — *Civic property-record platform, Bengaluru (~50M hits/month)*

- Audited the full property-record flow end to end, redesigned it, and led front-end development of the replacement portal.
- Cut median time-on-task from 40 minutes to 15, reduced an unresolved-issue backlog from 40,000+ to roughly 200, and integrated with the Kaveri land-records portal to eliminate duplicate, conflicting data entry.

BAMUL — *Oracle EBS migration, Karnataka's largest dairy cooperative*

- Led migration from legacy Oracle EBS to a modern platform across a 13-person team spanning database, backend, web, and mobile (Angular, Node.js, Flutter, PL/SQL), with middleware bridging both systems.
- Delivered in 8 months against a year-long program, supporting a ₹2,000 Cr (≈\$210M) annual payment pipeline with no disruption to daily procurement.

Hello UPI / Tonetag — *In-car contactless payments, Tata Motors*

- Defined the in-car UPI payment experience (QR scanning, fraud checks, transaction flow) and coordinated iOS SDK architecture with engineering.
- Reduced average transaction time 15% against conventional methods; encryption and fraud-prevention mechanisms validated through usability testing and QA before launch.

Ragmetrics — *AI KPI measurement tool for LLM output quality*

- Set product direction for an LLM evaluation tool, replacing ad hoc spot checks with synthetic-data generation pipelines and automated evaluation criteria.
- Ran stakeholder research to align the tool with the metrics teams actually needed, then refined prompt engineering and pipeline design against those findings.

Majik Kids — *Audio stories app for kids and parents*

- Owned the full product lifecycle from concept through Flutter build and Appwrite backend, running Kanban and Scrum delivery in Jira.
- Grew to 1,000+ organic downloads across both app stores within 2 months of launch.

TGI Sports — *Real-time stadium LED advertising platform, UK*

- Held scope, risk, and timeline end to end for a live ad-booking platform covering MLB league onboarding, geography-based targeting, and multi-vendor LED display integration with stadium hardware.
- Launched on schedule during live sporting events; client renewed on the strength of delivery.

AI Dashboard — *AI-powered business intelligence product*

- Defined product vision and scope, ran market and competitive analysis, and led the cross-functional team delivering real-time analytics and UX improvements.

EDUCATION

B.Tech, Electronics & Telecommunication — Bharati Vidyapeeth College of Engineering, Pune

2018 – 2022

CGPA 8.92 / 10

CERTIFICATIONS

SAFe 6.0 Product Owner / Product Manager (POPM) — Scaled Agile (2026)

AI for Product Management — Pendo (2024)

DP-100: Microsoft Certified Data Scientist Associate — Microsoft (2023)

Python for Data Science — DataCamp (2023)

Consumer Analytics — Wharton / Coursera (2022)
